Copper cable lug

Functionality

Copper cable lug for connections of **LOW** and **MEDIUM VOLTAGE** circuits. They are used in a wide range of sections, both for flexible and rigid copper cables in underground distribution networks. These terminals must be crimped by **HALF PUNCHING COMPRESSION**.

Product Features

Manufactured with **WELDED ELECTROLYTIC COPPER STRIP** with tinned surface finish to improve electrical contact and prevent oxidation.

These copper cable lugs are suitable for indoor and outdoor installations as long as any possible water inlet is sealed by tape or heat shrink, as could be the inspection hole and / or the remaining separation between terminal and cable once crimped.
