Voltage Detectors

SAFETY CATALOGUE

Omnidirectional electric field personal voltage detector Medium Voltage - Optical & Acoustic

Additional safety device for individual use.
Personal omnidirectional electric field detector. When the operator approaches an electric field between 10kV and 66kV and exceeds an approximate distance of 1m for 10 kV and 3m for 66kV, the detector emits a sound to inform the operator that he/she is in a danger area, and the sound will continue until the operator moves away from the voltage source.

648 D-TUERI

- Optimized for use in distribution / transformer substations & overhead lines
- Operating range: 10 kV to 66 kV
- Operating frequency: 50 and 60Hz
- Powered by two LR-03 batteries

Code	Ref.
645251	D-TUERI

Optional accessory to protect the detector (not included).

Inside placement

It can be placed directly inside the helmet or outside with the protector accessory

648 Accessory to protect the detector

- It allows the use of the detector outside the helmet.
- Protects from dust and water (IP 64).
- Protection against weather conditions
- Protection from falls and blows.

Code	Ref.
645650	D-TUERI CASE

Outside placement
