Product Technical Specifications

Mod. SP-35

Insulating vinyl cloth

Functionality

The insulating vinyl cloth is made of high-quality vinyl. It is used to achieve the necessary insulation in a low voltage element in electrical installations.

The fabric is designed to achieve an adequate insulation of the element to safeguard the integrity of the operator who is working.

Product Features

- **Thickness:** 0,3 mm
- **Dimensions:** 1,40 m x 50 m
- **Maximum voltage**
AC: <1000 V
DC: <1500 V
- **Class 0**

Raw Material Features

Cloth: **vinyl**.

Certificados

According to the Standard:

UNE 61112:2010

IEC 61112:2009 Live working - Electrical insulating blankets.
