Insulation / Insulating blanket

30503 MA

Insulating blanket

High-quality, durable rubber insulating blanket.
Designed to protect workers from low-voltage electrical hazards. The blanket is brightly coloured for easy identification and visibility in the work area.
These blankets are Category AZ, meaning they are certified for resistance to acids (Category A) and ozone present in electrical equipment (Category Z).

Base: Vulcanized elastomer
Minimum tensile strength: 12 MPa
Elongation at break: 300 %
Hardness: 60 Sh A
Mechanical puncture resistance
Flame retardant
Aging tests
Low temperature bending test

According to IEC 61112:2009.
Live working - Electrical insulating mats.

Code	Ref.	Width (m)	Length (m)	Class	Thickness (mm)	Weight (kg/m²)	Working tension
