Safety

Earthing and short-circuit equipment for trucks

TT-38L
Earth lathe

657 PAT-TT38L/03515

Earthing and short-circuit equipment for trucks. The main aim of installing this item is to protect workers from induced voltage and/or static electricity during maintenance and repair work on electric and hybrid cars.

Consists of:

- 2 T-38L milling earthing lathe.
- 1 15 m copper cable with PVC insulating sheath.
- 1 bag for transporting and storing the equipment
