### Medium and high voltage overhead lines - Automatic clamps

#### 30905 PATL-MC-4 4 clamps

Earthing and short-circuit equipment for voltage overhead lines.

The main aim for its installation is operator's protection against an accidental commissioning or possible voltage return during repair operations.

The MC clamp is fixed on bare conductors by pressure and can be removed by an operating hook. The three clamps can be placed at the same time thanks to the dispenser head facilitating operator's work.

According to IEC 61230 standard.
