

31307 SAE-400

Beacon for cable

Daytime marker beacon for overhead line installations, designed to warn aircraft of the presence of aerial conductors and to prevent potential collisions. Manufactured from fibreglass-reinforced polyethylene, it provides high resistance to ultraviolet (UV) radiation and extreme environmental conditions. The beacon features an aerodynamic profile and is supplied with hardware allowing for quick and secure installation and adjustment. It is suitable for mounting on live conductors, earth wires, and fibre optic cables.

External dimensions: 400 mm in diameter.
For cables with a diameter of 9 to 30 mm.
Available colors: RED-WHITE / RED-RED.

Code	Ref.	Ø	Weight
590100	SAE-400	400 mm	2,5 kg
