Technical Product Specifications

Model P/DMT

Lockout for switches

Description

Universal blocker, with a unique design, for mini circuit breaker switches for electrical circuits, with a lock.

Automatic lockout for switches using stainless steel sawtooth mechanism, adjustable to cover a wider range.

Suitable for circuit breakers with a maximum flange thickness of 9 mm, no width limit.

No tools required for installation.

We recommend using the professional security lock with the label.

Product Features

Be made of ABS resin, corrosion resistance and good insulation performance.

With a knob can tighten directly to install, easy to use, without assistant tools.

External dimensions:

Length: 58mm

Width: 42mm

Thickness: 14.5mm

Weight: 0.02
