Product Technical Specifications

Mod. SZ-100/120/180

Fire-resistant blankets

Functionality

The blanket is composed of a flame-retardant fabric. It is used for firefighting, especially to extinguish small fires where the use of fire extinguishers is discouraged.

It also allows self-protection to escape the flames or smother the burning clothes of a person.

Easy removal of the case, pulling the two straps unfolds the blanket for immediate use in the event of a fire hazard.

Product Features

- Quick extraction for immediate use.
- Not require maintenance.
- **Dimensions:**
 - SZ-100:** 100x100 cm
 - SZ-120:** 100x120 cm
 - SZ-180:** 120x180 cm
- **Maximum temperature:** 1100°C for 15 min.

Certified

According to the Standard:

UNE-EN-1869:1997 Fire blankets.

Raw Material Features

Fabric: **Fiberglass-based fabric.**
(Does not contain asbestos)
