Product Technical Specifications

Mod. LB

Bimetallic mechanical clamp

Product features

LB clamps are made of aluminum casting. Stainless steel screws. The compression of the conductors in this bypass clamp is by mechanical screw tightening. Its function is to make a connection or bypass of aluminum conductors of different cross-sections.

Certificates

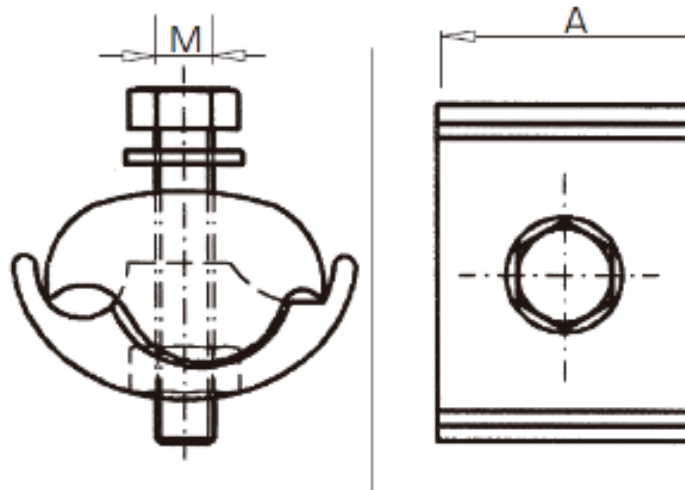

Manufactured according to the dimensional characteristics described in **UNE 211024** and tested according to **UNE-EN 60068-2-11** Environmental tests Part 2 Salt spray.

Model LB

Bimetallic mechanical clamp
