

11401 SCF/CT-1000V

MC4 type connectors behind the scenes

The MC4 connectors, male and female, are designed for the photovoltaic solar system between the solar panel and the inverter or the connection box.

They are a simple and safe way to connect two solar cables with sections between 2.5 mm², 4 mm² and 6 mm².

They are dustproof, waterproof, anti-aging, UV resistant.
