Product Technical Specifications

3-IN-1 PROFESSIONAL SCISSORS

Mod.TS-50

Functionality

The TS-50 electrician scissors are high-quality tools designed to offer three essential functionalities in one tool, providing efficiency and precision in electrical work.

Cutting

Equipped with high-hardness blades and a non-slip serrated edge, the TS-50 scissors allow precise and clean cuts on cables and wires up to 50 mm², ensuring optimal performance with each use.

Stripping

They integrate a specialized function for stripping cables, allowing the insulation to be removed quickly without damaging the internal conductors.

Crimping

They feature a crimping function that securely and efficiently joins terminals and ferrules, ensuring reliable and durable electrical connections.

Includes a durable nylon sheath that allows the scissors to be attached to a belt, providing greater comfort and ease of handling.

Mechanical Tools

Multifunctional electrician scissors TS-50

Features

Material: Made of stainless steel for exceptional strength and durability.

Blades: High-hardness blades with a non-slip serrated edge for precise cutting.

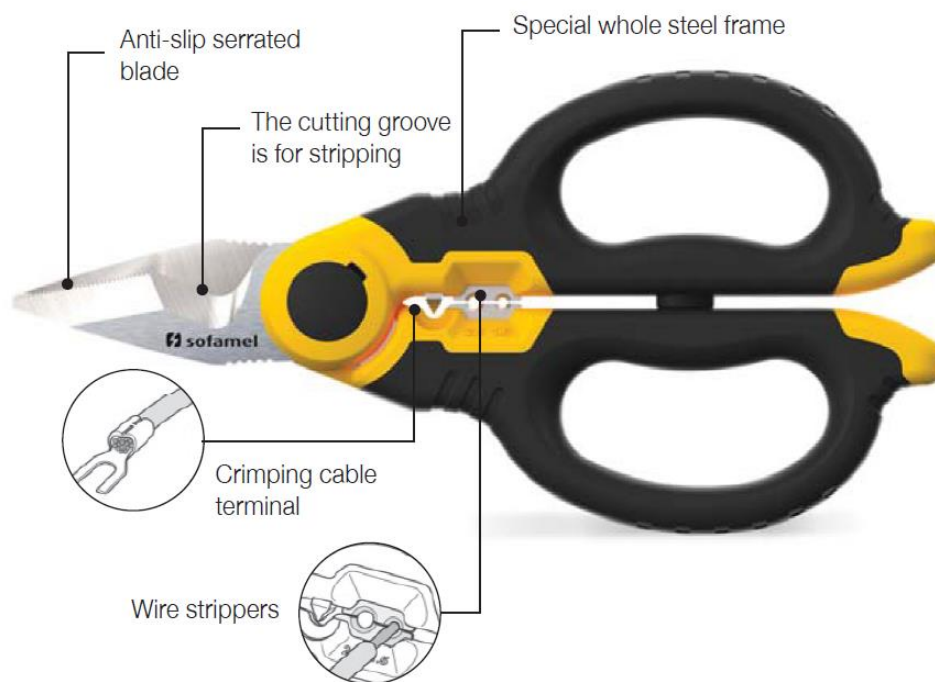

Handles: Lightweight, robust, and made of impact-resistant plastic material with embedded non-slip grooves for a secure grip.

Non-slip serrated blade: For greater cutting precision.

Frame: Made of high-quality special steel. The blades are an integral part of the entire frame.

Sheath: Made of wear-resistant nylon, ensuring durable protection. Includes a belt clip.

Code	Ref.	Max. cutting range	Crimping range	Stripping capacity between handles	Length	Weight
316000	TS-50	50 mm ²	2.5-6 mm ²	1.5/2.5 mm ²	160 mm	0.15 Kg

Materials

Handle: PP+TPR.

Blades: 4034 Stainless steel.

Sheath: Nylon.
