STRIPPING TOOL

Handle + Cable Stripping Heads

CSML-25/240

Functionality

The CSML-25/240 tool is designed to remove ethylene propylene rubber (G7) or cross-linked polypropylene (XLPE) insulation from 10/11 kV or 20/22 kV cables with the following cross-sectional areas: 25, 35, 50, 70, 95, 120, 150, 185, and 240 mm².

Product Features

Compatible with 10/11 and 20/22 kV MV cables.

The stripping length is adjustable from 20 to 100 mm using a built-in device in the handle, which includes a marked scale to facilitate the selection of the pre-set stripping length.

This tool is easy to handle thanks to its pre-adjusted inserts and allows for the adjustment of the stripping length according to the user's needs. It is specifically designed to work in confined spaces and features a bayonet-type handle connection for added convenience. Additionally, the blade is replaceable, extending the tool's lifespan and enhancing its versatility.

Contents

Handle.

Stripping inserts: 25, 35, 50, 70, 95, 120, 150, 185, 240 mm².

Tool carrying case.
