Product Technical Specifications

Model OB1

Dielectric boot covers

Functionality

The OB1 dielectric boot covers provide protection up to 7.5kV in the full boot for more than three minutes.

Product Features

- Front opening and closing. Easy to use.
- Ideal for personnel who must continually enter and exit hazardous areas.
- One-piece injection molded construction with integrated molded closure ensures there are no seams or mounting/closing holes to leak.
- No metal fasteners or components are used in the construction.
- Heel protection.
- Blue dielectric compound slip resistant sole.
- Fuel and oil resistant body and sole.

Model OB1

Dielectric boot covers

Care

- Machine washable up to 40°C.
- Service life more than 10 years.

Electrical protection

- On all boot covers: at 7.5kV 3 minutes, no damage.
- At 5 kV: Less than 5mA leakage current.
