Product Technical Specifications

Mod. SO-06

Clamping belt with ropes

Functionality

It is specially designed and manufactured to work in situations in which there is no risk of falling from height, this allows the user to tie himself to the structure in which he is working, leaving this subject firmly and safely.

Product Features

The fastening belt has two side hooks at each end to be able to attach a lanyard. The belt is designed so that it can adapt to the different physical constitutions of the users, and to all kinds of gestures and postures necessary so that they can exercise their activity with total comfort.

Dorsal band

It is the comfort band, perfectly padded by its foam padding, to avoid the discomfort of the belt on the user.

Its design allows a perfect fit in the lower back of the user. The dorsal band is sewn to the waist band.

Mod. SO-06

Clamping belt with ropes

Waist band

It is a red polyester tape 45 mm wide highly resistant.

The buckles that make the hook element are incorporated on the waist band. These are circular in section and have a "D" shape. The adjustment of the belt is made by regulating the length of the band by means of the buckles that it has incorporated.

Supplied with adjustable rope and carabiner.

The nominal load of the set is 100 Kg.

Approximate weight of the Set: 0.848 Kg.

Expiration

The theoretical useful life of the equipment is 10 years from the date of manufacture and 5 years from the first use.
