

PEP CLAMP

EQUIPOTENTIAL POLE CLAMP

Functionality

The main purpose of PEP clamps is to be used for grounding and short-circuiting of overhead networks with equipotential bonding of the working area.

Product Features

The PEP clamp consists of

- A steel pole support allowing the connection of the earthing clamps.
- A tensioning body assembly (steel body and treated steel shaft) allowing the pre-positioning of the parking assembly on the pole.
- A corrosion-treated steel chain fastened to the pole support.

WEIGHT: 4.5Kg
