

Product Technical Specifications

## Mod. TPE <br> Copper cable lug narrow palm

## Functionality

Copper cable lug for connections of LOW and MEDIUM VOLTAGE circuits. They are used in a wide range of sections, both for flexible and rigid copper cables in underground distribution networks. These terminals must be crimped by HEXAGONAL COMPRESSION or by PUNCHING COMPRESSION.

## Product Features

Manufactured from electrolytic copper with a tinplated finish to improve electrical contact. The narrow design of the blade makes them suitable for small spaces.

These copper cable lugs are suitable for indoor and outdoor installations as long as any possible water inlet is sealed by tape or heat shrink, as could be the inspection hole and / or the remaining separation between terminal and cable once crimped.

## Mod. TPE

## Copper cable lug narrow palm

The Sofamel cable lugs are marked with the Sofamel logo and the section and the $\varnothing T$.

The sections of this product can be from 50 to 240 $\mathbf{m m}^{\mathbf{2}}$ and the blade drill can have measures of $\mathbf{6}$, 8 , 10 and 12 mm .

## Raw Material Features

## COPPER

Copper type: 99.9\% electrolytic copper.
Specific gravity: $\mathbf{8 . 9 5} \mathbf{~ g r} / \mathbf{c m}^{3}$.
Conductivity at $20^{\circ} \mathrm{C}$ : 58.14 Siemens $\mathbf{x ~ m} / \mathrm{mm}^{2}$.
Resistivity at $20^{\circ} \mathrm{C}$ : $\mathbf{0 . 0 1 7 2} \mathbf{O h m s} \mathbf{x ~ m m}{ }^{2} / \mathrm{m}$.
Surface treatment: tin bath $5 \mu$ thick.

## Certified

According to the standard IEC 61238-1.
Comply with Directive 2002/95 / EC of the European Union (RoHS).
