

Capicorda in Rame

Connessioni

10113 TCD

Capicorda in rame rinforzato DIN 46235

I terminali in rame TCD sono realizzati in rame elettrolitico con una finitura superficiale stagnata che protegge dall'ossidazione.

Il loro design rinforzato li rende particolarmente adatti per installazioni soggette a vibrazioni o elevati sforzi meccanici.

Conforme alla norma DIN 46235.
